

# SLIM WGX angle heads

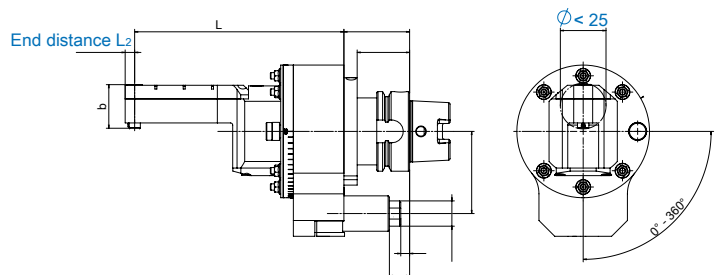

## Applications

- Workpieces with difficult access and clearance issues e.g. steering box, bleeder holes, small cavities, rivet holes...
- Suitable for machining in very tight spaces
- For multi-axis-machines
- Ideal for drilling and tapping

## Features

- Min. end distance: 7,5mm
- Bore diameter < 25mm
- High design variety
- Large standard range of heads
- Modular design so heads can be used for multiple purposes

New angle head catalog: Tool systems for machining centers p. 39 - 43
